Subject: Meet with AFPM on PFAS

Importance: High

Dear Mr. Dunlap—

AFPM requests a meeting with you to discuss ORD's work on PFAS—specifically risk assessment, remediation technologies, and any future work involving industry. AFPM is a national trade association whose members comprise virtually all U.S. refining and petrochemical manufacturing capacity. AFPM's member companies produce the gasoline, diesel, and jet fuel that drive the modern economy, as well as the chemical building blocks that are used to make millions of products that make modern life possible. Our member companies are subject to a broad range of regulatory programs, including air, water, solid waste and TSCA regulations overseen by the Environmental Protection Agency (EPA). The PFAS issue is of high interest to our members as many use or have used in the past firefighting foam containing PFAS. Please find below a proposed agenda for our meeting. We know you must have a hectic schedule so we are asking for a meeting in early April if possible. Please let us know which days may be open and I will coordinate with AFPM staff. Thanks and look forward to our meeting!

- I. Introductions
- II. ORD Work on PFAS Issue
- III. Risk Assessment Process (AFPM)
- IV. Remediation Research?
- V. Next Steps
